Project Engineer PSCAD (gn)

(18705)

Standort: Erlangen

Job ist nicht gleich Job. Er soll zu dir passen, dich fordern und angemessen bezahlt sein. Das sehen wir auch so, deswegen bringt PAMEC dich mit den Unternehmen zusammen, die wirklich zu dir passen. Wenn du deinen Job liebst, machen wir unseren richtig – und das seit 1984.

We are seeking a **Project Engineer PSCAD (gn)** for our client, a globally operating company across the entire **energy value chain**

Your tasks:

- Supervising the performance and project management facets of studies concentrated on the analysis of electrical power systems, network planning, and grid development.
- Planning and executing analyses on electrical power systems, formulating network structures, simulating electrical power systems, and modeling diverse electrical network elements, encompassing power electronics.
- Coordinating and aligning engineers from varied technical groups and virtual teams within a multicultural setting.
- Incorporating power electronic devices, renewable generation, storage devices, etc., into AC grids through conceptual studies, feasibility studies, tender studies, and project execution.
- Managing the coordination of external partners and subcontractors in project execution.

Qualifications:

- Master's degree in electrical power engineering from a university
- Proficient knowledge in common power system simulation programs (e.g., PSS/E, PowerFactory, PSCAD/EMTDC)
- Effective communication skills in both business-level English and German
- Initiative, creativity, analytical and strategic thinking, teamwork, customer orientation, and working within intercultural teams define your preferred working environment.
